

Lake County Construction and Demolition Debris Recycling Plan

This form must be completed by the applicant **before** a permit will be issued for any new construction, renovation, and/or demolition projects of **1,500 square feet** or greater gross floor area.

Permit Number _____ Project Description: _____

Start Date of Construction: _____
(Enter a proposed start date)

1. Please identify what materials will be diverted from disposal to meet the 75% diversion Requirement:

2. Will the C&D debris be separated on-site or left co-mingled and taken to a C&D debris recycling facility for final sorting?

Describe _____

3. List vendors or facilities that will collect or receive the C&D Debris: _____

Please take note of the following requirements:

- It is the owner/contractors responsibility to verify that 75% of all construction and demolition debris has been diverted from area landfills. This includes all debris hauled away by sub-contractors.
- The waste hauler you select must be informed that there is a construction and demolition debris diversion ordinance. The hauler selected must submit verification of compliance before a final inspection can be scheduled. The verification must be approved by this department before a Certificate of Occupancy can be issued.
- Failure to comply with the Lake County Solid Waste Hauling and Recycling Ordinance may result in fines and hearing costs in excess of \$1,000.00.

Lake County Solid Waste Hauling and Recycling Ordinance

Construction and Demolition Debris Recycling Program

Effective January 1, 2014, Lake County has adopted the Lake County Solid Waste Hauling and Recycling Ordinance. This ordinance requires 75% of construction and demolition debris to be diverted from landfills for all new construction, renovation, demolition, entire re-roofing, or entire re-siding projects of 1,500 square feet or greater gross floor area, in unincorporated Lake County.

For all re-roofing and re-siding projects, there are two steps to construction debris recycling:

1. Sign and notarize the re-roofing or re-siding registration form or permit application.
2. Have the construction debris hauled to a facility that recycles, meeting the 75% diversion requirement.

For all other projects of 1,500 square feet or greater gross floor area, there are four steps to construction debris recycling:

1. Sign and notarize the permit application.
2. Complete the "Construction and Demolition Debris Recycling Plan" and submit with your permit application documents.
3. Have the construction debris hauled to a facility that recycles and ask for receipts that show the weight of debris generated by the project and the weight of debris being recycled or diverted from landfill disposal.
4. Ten or more days prior to final inspection, submit a completed "Construction and Demolition Debris Recycling Compliance Report" along with the receipts that show that the 75% diversion requirement has been met. Please fax to (847) 984-5854 or send by email to lcpermits@lakecountyil.gov.

The full text of the ordinance is available online at: <http://goo.gl/314uqK>

If you have any questions, please call the Lake County Central Permit Facility at (847) 377-2600.

I/We, _____, agree that I/we will comply with the requirements of the Solid Waste Hauling and Recycling Ordinance by diverting 75% of construction and demolition debris generated by this project, as described above. **I understand that compliance with this ordinance is mandatory. Failure to comply may result in fines and a delay in issuance of a Certificate of Occupancy.**
